## Construction & Disaster Recovery Services

### Capabilities Narrative

Founded in 1999, RAS Construction (RAS) is a Florida corporation with a long and successful history in overseeing debris pickup and removal operations resulting from natural disasters. RAS is a 100% minority-owned company with extensive experience in providing quality emergency debris removal services to municipalities and the communities they serve. RAS's experience in the disaster recovery industry dates to 1992 when Hurricane Andrew made landfall in Dade County as a Category 5 storm.

### Core Competencies

- Vegetative Debris Hauling & Removal
- Construction & Demolition Debris Hauling & Removal
- Debris Sorting, Grinding & Reduction
- Removal of Hazardous Stumps, Trees & Hanging Limbs
- Loading & Hauling of White Goods
- Temporary Debris Site Management
- Site Development
- Drainage & Paving
- Water & Sewer
- Sidewalks Curb & Gutter
- Roofing Construction

### Key Differentiators

RAS's experienced personnel offers a wide array of additional emergency services and solutions including:

- *Compliance Monitoring* to ensure all work is performed according to FEMA, state, and local regulations.
- *Technological Innovations* such as database development to keep records accessible and secure.
- *Accounting and Auditing* for concise and accurate invoicing.
- *Customer Service and Claims Management* to ensure that the community being served is satisfied.
- *Quality Assurance* by supervisors to keep personnel accountable for their work and to ensure the highest quality of service.
